STATINTL

Dear Chris:

STATINTL

Enclosed are specifications and photographs of a highly modified version of the  Type 829A Comparator. Two of these comparators were recently delivered to the Physical Science Laboratory of the  This group does a great deal of the data reduction for the White Sands Missile Range. STATINTL

STATINTL It is quite possible that your requirements are not identical but it serves to show how versatile the  Type 829A Comparator can be in film sizes of 5 1/2", 70mm or even smaller.

Particularly for fast, precise measurements of distances on 70mm formats at the lowest possible cost we feel it is unequalled. Still for heavy workloads it can be fully digitized which will make it a production instrument.

STATINTL For the comparator shown with a 5 1/2" self contained film stage, full rotating 70mm film stage, rotating projection screen graduated to .1 degree and special table, we quote  Delivery 90 days after receipt of order at  Terms 1/2 of 1% 10 days, net 30 days. Quote firm for 45 days. STATINTL

The X and Y precision screw motions can be digitized but this quotation does not include the digitizing system or the heads.

We are working with a nationally known company now in an effort to come up with our own digitizing package. We have put heavy stress on the importance of reliability and believe shortly we may have a solid state system at the same or lower cost than any other of which we are currently aware.

We will be attending the ASP show in Washington on the 20th, 21st and 22nd of March. We will not have a booth this year but will be staying at the Shoreham and will contact you during the meeting. I will have a copy of this material with me so we can discuss it in more detail.

Very truly yours,

STATINTL
